

SYED ALI HASAN GILANI

Senior React Native Developer | Mobile Applications Consultant
Lahore, Pakistan | +92 332 490 2775 | alihasan21987@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Senior React Native Developer with 6+ years delivering production mobile apps across banking, real-time geolocation, and real estate — including a live banking app for Mashreq, a background-geolocation tracking app (Serendipity), and a location-driven real estate platform (Batch Driven). Track record of measurable impact: +35% app speed, -25% crash rate, +20% user retention, +15% team productivity. Deep expertise in React Native, Redux (Toolkit/Saga/Thunk), GraphQL, REST APIs, and Socket.IO, with proven leadership mentoring engineers in Agile environments.

CORE COMPETENCIES

React Native Development • Cross-Platform Architecture • Background Geolocation • Team Leadership • Agile/Scrum • Performance Optimization • Real-Time Data & API Integration • State Management • App Store Deployment

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Dart
Frameworks: React Native, Flutter
State Management: Redux Toolkit, Redux Saga, Redux Thunk, Zustand
APIs & Data: GraphQL, REST APIs, Socket.IO, Strapi (CMS)
Tools & Platforms: Git, Bitbucket, Jira, ClickUp, Trello, VS Code, Android Studio, Xcode

PROFESSIONAL EXPERIENCE

- Mobile Consultant – React Native**
Systems Limited | Mashreq Banking App
08/2025 – Present
Lahore, Pakistan
 - Build and ship customer-facing features for the Mashreq Banking App, a production React Native banking platform, using Redux Saga, REST APIs, and CMS-driven content to support secure account and transaction workflows.
 - Champion React Native engineering best practices across the squad, driving a 15% increase in team productivity and overall code quality on a regulated, high-stakes financial product.
 - Partner directly with product owners and designers to scope requirements and set realistic delivery timelines for new banking features.
- Team Lead / Senior React Native Developer**
Crewlogix | Serendipity
01/2024 – 07/2025
Lahore, Pakistan
 - Led development of Serendipity, a real-time user-tracking app that maintains accurate background location updates even in killed state, using the react-native-background-geolocation plugin.
 - Architected the app's real-time data layer with Redux Toolkit, GraphQL, and Socket.IO to sync live location data reliably between mobile clients and backend services.
 - Mentored a team of React Native developers on engineering best practices, raising team productivity and code quality by 15%, while owning sprint planning and backlog grooming under Agile/Scrum.
 - Collaborated with product owners to define requirements and priorities, delivering complex background-location features on time and within budget.
- React Native Developer**
PureLogics | Prayer App & Batch Driven
01/2021 – 05/2023
Lahore, Pakistan
 - Built and optimized the Prayer App, applying React Native performance best practices that improved app speed by 35% and cut crash rates by 25%.
 - Developed Batch Driven, a location-aware real estate app that surfaces nearby properties in real time as users move or pass by a road, integrating geolocation with REST APIs.
 - Shipped features based on stakeholder feedback across both apps, increasing customer satisfaction by 25% and boosting user retention by 20%.
 - Partnered with backend engineers and UI/UX designers to deliver seamless API integrations and polished, high-quality user experiences.

EDUCATION

M.S., Computer Science – Software Engineering, UET Lahore 09/2020 – 08/2022
B.S., Computer Science, University of Agriculture, Faisalabad 09/2016 – 07/2020

AREAS OF INTEREST

AI-powered mobile apps (predictive analytics, chatbots) • Computer vision & AR • Decentralized apps (Web3)
